

## Jordan Miller

**Role:** Senior Full Stack Architect | **Focus:** Python/Django, React, AWS Cloud Architecture

### Summary

Results-driven **Senior Full Stack Developer** with **6 years** of progressive experience in leading the design, development, and maintenance of scalable SaaS platforms. Possesses deep expertise across the entire stack, specializing in **Python (Django)** and modern front-end development with **React** and **TypeScript**. Proven proficiency in **PostgreSQL** management, **RESTful API** design, and robust cloud deployment using **AWS** and **CI/CD** pipelines. Seeking to lead innovative platform development at Innovatech Solutions.

### Professional Experience

#### Full Stack Architect & Team Lead

**Platform Dynamics, Inc.** | 2020 – Present (4 years)

- **Led** the full software development lifecycle for a core SaaS product, managing a team of 4 developers.
- Designed and implemented highly **scalable backend services** using **Python/Django**, including architecture for complex data modeling and efficient **RESTful APIs**.
- Developed high-performance, responsive **user interfaces** using **React, Redux, and TypeScript**.
- Architected and optimized the production **PostgreSQL** database environment, improving query speed by 25%.
- Managed the entire cloud infrastructure on **AWS (EC2, S3, RDS)**, ensuring high availability and performance.
- Implemented and maintained automated **CI/CD pipelines** using **Jenkins** and **GitLab CI**.
- **Mentored** three junior developers, conducted regular **code reviews**, and enforced development best practices.
- Managed sprints and deliverables using **Agile/Scrum** methodologies.

#### Full Stack Developer

**Tech Forward Solutions** | 2018 – 2020 (2 years)

- Contributed to microservices development using **Python/Flask** and built reusable components with **React**.
- Utilized **Docker** for containerization of services and gained exposure to **Kubernetes** for cluster orchestration.
- Assisted in database management (MySQL) and security hardening.

### Skills & Technologies

Category	Skills & Tools
<b>Languages</b>	Python (Expert), JavaScript (ES6+), <b>TypeScript</b> , SQL, HTML5/CSS3
<b>Backend</b>	<b>Django, Flask</b> , RESTful API Design, Microservices
<b>Frontend</b>	<b>React</b> , Redux, Node.js, Webpack, Responsive Design
<b>Database</b>	<b>PostgreSQL</b> (Expert), MySQL
<b>Cloud/DevOps</b>	<b>AWS (EC2, S3, RDS)</b> , <b>Docker</b> , <b>Kubernetes (Plus)</b> , <b>Jenkins</b> , <b>GitLab CI</b> , Git
<b>Methodology</b>	<b>Agile/Scrum</b> , Software Development Lifecycle (SDLC), Code Review
<b>Soft Skills</b>	<b>Leadership</b> , <b>Excellent Communication</b> , Mentoring, Database Architecture

That JD is very specific! To achieve a  $\mathbf{100\%}$  match, every keyword and requirement, including the years of experience, specific technologies, and soft skills, must be explicitly addressed.

Here is a sample resume tailored to be a perfect match for the **Senior Full Stack Developer (Python/React)** role at Innovatech Solutions.
